PROFESSIONAL SUMMARY

Motivated Junior Android Developer with 8+ months of hands-on experience building scalable, maintainable mobile applications. Proficient in Kotlin, Jetpack Compose, MVVM, Clean Architecture, and modern Android development practices. Strong background in RESTful APIs, Firebase, and asynchronous programming (Coroutines, Flow). Currently completing ITI Professional Diploma with proven ability to deliver production-quality code and collaborate with Agile teams.

EDUCATION

Bachelor of Science in Computer Science

Benha University | Oct 2021 - May 2025

GPA: 3.26/4.0 (B+)

Capstone Project (Grade: A): "AI-Powered Digital Detox Platform" - Developed a mobile application helping users reduce digital addiction through behavioral tracking and habit formation features.

Professional Diploma - Mobile Applications Development (Native)

Information Technology Institute (ITI), Smart Village | Completed: Aug 2026

PROFESSIONAL EXPERIENCE

AI Coding Expert

Outlier | Remote | Nov 2024 - May 2025

Reviewed and optimized AI-generated code samples across multiple programming languages and frameworks. Identified edge cases, validated technical accuracy, and provided actionable feedback for improving response quality and relevance to user intent. Contributed to AI model improvements through systematic error analysis and quality assurance processes.

PROFESSIONAL TRAINING & INTERNSHIPS

Android Developer Nanodegree

Route Academy, Nasr City | Oct 2024 - Apr 2025 (Hybrid)

Completed comprehensive Android development curriculum emphasizing Kotlin and Java. Mastered MVVM and MVP architectural patterns for scalable, maintainable code. Built responsive, modular UI components using XML layouts with focus on code reusability and Material Design principles.

Mobile Developer Intern - Android Track

Digital Egypt Pioneers Initiative (DEPI), MCIT | Jun 2024 - Oct 2024 (Hybrid)

Delivered 3 production-ready Android applications using Java and Kotlin with Clean Architecture principles. Gained hands-on experience with Android lifecycle, database integration (Room), networking (Retrofit), and asynchronous programming. Expanded technical expertise by prototyping cross-platform application using Flutter, strengthening understanding of multi-platform development paradigms. Worked in Agile team environment with code reviews and continuous feedback.

FEATURED PROJECTS

Carto - E-Commerce & AI Shopping Platform | [GitHub](#)

Technologies: Kotlin, Jetpack Compose, MVVM, Clean Architecture, Hilt, Room, Apollo GraphQL, Coroutines

Developed a native Android e-commerce platform with Shopify integration, featuring offline persistence via Room, a Paymob payment integration, an AI-powered shopping assistant, and a reactive UI built with Jetpack Compose and MVI architecture. Implemented Hilt for dependency injection and utilized Apollo GraphQL for efficient and type-safe API communication.

Tempo - Weather Forecasting App | [GitHub](#)

Technologies: Kotlin, Jetpack Compose, Work Manager, MVVM, Retrofit, Coroutines, Flow, REST APIs

Developed a real-time weather Android app with GPS-based location search, background data synchronization via WorkManager, and clean asynchronous data handling using Coroutines and Flow. Implemented responsive UI using Jetpack Compose with efficient state management and error handling.

Foodo - Food Planner App | [GitHub](#)

Technologies: Java, MVP, Room Database, Retrofit, RecyclerView, REST APIs

Built a meal-planning Android app with full offline support via Room Database and REST API integration for meal data. Implemented clean separation of concerns using MVP architecture with proper data binding and RecyclerView optimization for smooth user experience.

TECHNICAL SKILLS

- **Languages:** Kotlin (Advanced), Java, Swift, C++
- **UI:** Jetpack Compose, XML Layouts, Material Design 3
- **Architecture & Core:** Clean Architecture, MVVM, MVI, SOLID Principles, Hilt, Koin
- **Jetpack Libraries:** ViewModel, Navigation3, WorkManager
- **Async & Data:** Coroutines, Flow, RxJava | Room, DataStore, Retrofit, Ktor, REST APIs, GraphQL
- **Cross-Platform:** Kotlin Multiplatform (KMP), Compose Multiplatform
- **Cloud:** Firebase (Authentication, Firestore, Cloud Messaging)
- **Testing & Tools:** JUnit, Mockk, Git, GitHub, GitFlow, Gradle, CI/CD Pipelines, Figma, Jira
- **Soft Skills:** Team Leadership, Communication, Team Work, Agile/Scrum Methodology

ACHIEVEMENTS & RECOGNITION

1st Place – JETS MobileX Challenge 2026 (Android Track) – Recognized for developing an AI-powered Shopify e-commerce application at ITI Smart Village.

ITI Problem-Solving Assessment Top Performer - Ranked among top 35 performers across all ITI students in algorithmic assessments, demonstrating strong data structures and algorithms expertise.

ECPC Finalist (2023, 2024) - Qualified for Egyptian Collegiate Programming Contest finals in consecutive years, competing among top university teams nationwide.

IEEE Benha Problem-Solving Team (2023) - Active participant in competitive programming training and Egyptian Collegiate Programming Contest preparation within IEEE Student Branch.

LANGUAGES

Arabic (Native) - English (Intermediate)

ADDITIONAL INFORMATION

Military Status: Exempted
